USER AGREEMENT

Concerning the usage of the dormitory network

As a condition of my access to, and usage of, the network I accept:

to pay the at any time determined usage fee.

to adhere to the conditions in this user agreement, the dormitory's house rules, and existing laws.

that I will not give third parties access to the network.

to follow all instructions or directions from the netgroup.

that I can be disconnected from the network following the procedure established in the house rules, in case of violation of existing laws, or guidelines established in house rules or in this user agreement.

that there will be conducted inspections of wireless network components that I use. The net group can in case of unsecure networks, connect to these in order to test the security.

Furthermore by signing this user agreement I give consent:

that there can be conducted automatic surveillance (logging) of all my use of the network for *technical inspections* (troubleshooting, network load measurements, etc.). All personal information will be deleted immediately after the tests are concluded. The net group cannot pass this information along.

that there will be conducted automatic surveillance (logging) of my use of the dormitory servers and the connection in and out from the dormitory, for *security purposes* (abuse, hacking). The net group can, in case of suspicions of abuse, go through all the user data I have made accessible for others than myself and the system administrator (e.g. my home page and files shared with others). The net group can pass along necessary documentation for violations to the dormitory board.

that there can be conducted automatic backup of my data on the dormitory servers. This backup can be saved for 6 months. Backed up data will only be retrieved for reestablishment of data on the dormitory servers, or by my request.

that the net group, by a warrant from relevant authorities can be ordered to pass along information about my use of the network.

that if I am subletting the apartment to a third party, I am responsible for the tenant's Internet traffic, unless the tenant has signed a statement that I have the responsibility to draft and keep as evidence. Such statement shall contain signatures and the date for the entire period the apartment is rented.

I have been informed that at any time I can request to be informed, which information has been registered about me, as well as I can demand false or misleading information to be deleted, and that the net group shall consider these questions after the rules in chapters 9 and 10 in the Danish Act on Processing of

Personal Data (*Persondata*loven). The dormitory net group is, as controller, responsible for handling all data in accordance with *Persondata*loven.

Logging of access to K-Net

K-Net stands for the dormitory's access to the internet and for the connection to the other dormitories within K-Net, and has in that regard initiated the following with regards to logging:

1. K-Net will as controller conduct registration of the usage of K-Net (logging) for security purposes, and with the purpose of troubleshooting, so that e.g. external abuse can be prevented, and in order to assist the individual dormitories to act against internal abuse and illegal network behaviour.
2. Only the following information will be logged: Date and time of usage of the network, address of sender and recipient of information via the network, the types of network traffic, and user names (student account number).
3. The log will only be reviewed under suspicion of hacking or other security risk, as well as when there is a specific and strengthened suspicion that a user is utilising the network in violation of existing laws or internal guidelines for network behaviour.
4. As a main rule information from the log will not be passed on.
5. You can at any time request K-Net to inform you, which information has been registered about you. To the extent that it is technically possible, such a request will be answered as soon as possible.
6. You can at any time object to the registration of your information.

As K-Net has its network access delivered by Forskningsnettet, you are presumed to be familiar with, and have accepted, the at any time existing rules for use of Forskningsnettet, which can be found at:

http://www.forskningsnettet.dk/sites/forskningsnettet.dk/files/File/Tilslutningsvilkar_Forskningsnettet_2008.pdf

() **ONLY CHECK HERE IF:** I **cannot** accept the above terms, and renounce with my signature the right to use the dormitory's network.

You have received this user agreement in _____ copies. One copy shall under all circumstances be filled in, signed and returned to the net group or dormitory board, whether or not you wish, or do not wish, to use the dormitory network. The other copy can be kept as a reference.

If you wish to use the dormitory network, you will need to contact the net group. The net group will then establish you as a user.
